Hi Everyone,

The news is still 24/7 Covid but my hopes are that you and your loved ones remain unaffected. Markets have held up remarkably well thus far. Of course, we will continue to monitor data which could effect performance. Stay well. As always, thank you for your continued trust in my team and me. Darin, Emily, Emily

## Do You Have a Will?

Although 76% of U.S. adults say having a will is important, only 40% actually have one. The most common excuse is, "I just haven't gotten around to it." It's probably not surprising that older people are more likely to have a will, but the percentage who do is relatively low considering the importance of this legal document.

# The Changing College Landscape

The 2020-2021 academic year is right around the corner, and the coronavirus pandemic has upended the college world, like everything else. Not only has COVID-19 impacted short-term college operations and student summer plans, but the virus could end up being the catalyst that changes the model of higher education in the long term. Here are some things to know about the changing college landscape.

**College funds.** Market volatility has been at record high levels this year, and college nest eggs may have taken a hit. Parents who have lost their jobs or otherwise suffered significant economic hardship due to COVID-19 might reach out to their child's college financial aid office to inquire about the possibility of a revised aid package, if not for fall then for spring.

Parents of younger children may want to review their risk tolerance and time horizon for each child's college fund. Parents who are using a 529 plan to save may have experienced one of the drawbacks of these plans in 2020: the restriction that allows only two investment changes per year on existing 529 account balances. This limitation can make it more difficult to respond to changing market conditions.

**Student loan payment pause.** The Coronavirus Aid, Relief, and Economic Security (CARES) Act enacted in March 2020 created a six-month automatic suspension of student loan payments for millions of federal student loan borrowers, along with a six-month interest freeze. The six-month period ends on September 30, 2020. Borrowers who anticipate having trouble restarting their monthly payments in October can contact their loan servicer to inquire about eligibility for an [income-driven repayment](#) plan.

**Potential refund for spring room and board.** Colleges were one of the first sectors to act in the early days of the coronavirus outbreak, asking students to extend their spring breaks in March and then directing them to stay home for the rest of the semester and finish classes online. Many colleges offered partial refunds for room-and-board costs for March, April, and May, but only for students living in dorms and on a college meal plan, not for off-campus students. If you think your son or daughter may have been entitled to a refund and didn't get one, contact the college to inquire.

**Updated health guidelines for fall.** Students heading back to college will likely find updated guidelines on social distancing and best practices for health and wellness, with potential restrictions on almost every facet of college life, including living in dorms, attending classes, eating in dining halls, and participating in student activities. Some programs may be limited or unavailable, such as studying abroad. Make sure your child has up-to-date health insurance and knows how to contact the campus infirmary if the need arises.

## Interest Rates on Federal Student Loans

Interest rates on federal student loans have decreased to record lows for the 2020-2021 academic year. The new rates apply to federal Direct and PLUS Loans disbursed July 1, 2020, through June 30, 2021.

	2020–2021	2019–2020
<b>Direct Loans:</b> Undergraduates	2.75%	4.53%
<b>Direct Loans:</b> Graduate Students	4.30%	6.08%
<b>PLUS Loans:</b> Parents and Graduate Students	5.30%	7.08%

**Expanded online learning.** Many colleges were already offering online classes before the coronavirus outbreak, but the pandemic shined a spotlight on this critical capability. Look for colleges to ramp up their online course offerings and make them more widely available to all students, not only during times of crisis but as part of a typical semester's course offerings. Some colleges might even require their fall semesters to be entirely online. Students will need to continually embrace new technology related to remote learning.

**College selection.** The coronavirus may have a long-term impact on how students choose colleges going forward. Cost is likely to play an even greater role, as many families may have less income and savings to put toward college expenses. This is likely to sharpen the focus on a college's net price. Location may also play an outsized role. Will students choose colleges closer to home for logistical and personal reasons? If so, look for state flagship schools to become even more popular, which will in turn increase their competitiveness.

# Could You Be Responsible for Your Parents' Nursing Home Bills?

In 26 states (and Puerto Rico), laws generally hold children financially responsible for certain debts of their parents. These laws are referred to as filial responsibility laws (or filial support or filial piety laws).

The details of filial responsibility laws vary by state. Most require that a parent must be deemed unable to pay for the costs of basic care and support before a child may be held responsible. And most states consider the child's ability to pay before holding the child liable for the cost of a parent's health care.

Filial responsibility laws are generally not enforced. But one 2012 case out of Pennsylvania may provide an example of how these laws might be used. *Health Care & Retirement Corporation of America v. Pittas* addressed the question of whether a child can be held responsible for the health-related debts of a parent.

The court found an adult son responsible for \$93,000 in nursing home costs incurred by his mother. The court also ruled that there was no duty to consider the parent's other possible financial resources for payment, which included her husband and two other adult children, or the fact that an application for Medicaid assistance was pending at the time of the claim against the child. The court found that the plaintiff had met its burden under the law by proving the child had the financial means to pay the outstanding bill.

As the Pennsylvania case illustrates, filial responsibility laws may come into play in situations when a parent incurs expenses for long-term care and lacks the financial means to pay them. This is not an issue when someone becomes eligible for Medicaid, because Medicaid pays for most long-term care services and does not require the recipient's children to contribute funds toward the parent's care; later, funds can be recovered through the Medicaid estate recovery process. In addition, federal law bars a nursing home from requiring a third-party guarantee of payment as a condition for either admission (or expedited admission) or continued stay of a patient.

What happens when a person admitted to a skilled nursing facility doesn't qualify for Medicaid but lacks the financial resources to pay the bill? For example, it's not uncommon for aging parents to gift assets to their children in order to qualify for Medicaid.

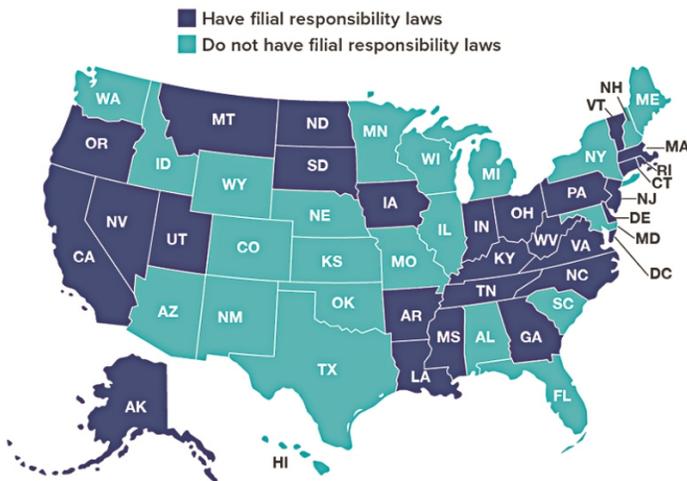

Under current rules, there is a five-year look-back period from the time the application for Medicaid is made. Gifts made during this look-back period may disqualify an applicant from receiving benefits for a certain period, which could be up to several months. In Connecticut, for example, nursing homes have the right to pursue claims against children of patients who made disqualifying transfers of assets (gifts) within two years of applying for Medicaid benefits.

Even though filial responsibility laws haven't been prevalent, soaring long-term care costs could continue to place a growing burden on Medicaid, pushing federal and/or state government budgets higher. More of the cost of health care could shift to patients and their families, giving nursing homes and other health-care providers more incentive to pursue claims against children for the unpaid costs of care provided to their parents.

In any case, filial responsibility laws provide yet another reason for families to plan for long-term care. Talk to a qualified attorney if you have concerns or need more information regarding your specific situation.

## States with Filial Responsibility Laws, 2019

# Going Mobile

After a slow start, mobile payment usage is growing in the United States. In 2019, an estimated 64 million Americans (about 29% of smartphone users) made a point-of-sale proximity payment with their mobile phones at least once in the previous six months. Mobile peer-to-peer applications, which allow transactions between individuals, have been even more widely adopted, with 69.2 million users in 2019.<sup>1</sup>

Younger people have been the fastest to adopt these new technologies, but mobile payment apps offer features that could be helpful for consumers of any age.

## Proximity Payments

A proximity payment involves using your mobile phone to pay at a point-of-sale terminal, typically by scanning a barcode generated on your phone or tapping the phone on the terminal (or holding it close) using near-field communication technology. This allows you to use a mobile phone instead of a credit card or debit card. The mobile payment application is connected to your bank account, a credit card, or a balance within the app.

Proximity payments were originally dominated by proprietary applications controlled by mobile phone manufacturers, but apps offered by specific merchants are now competing with the more general apps. Banks and credit-card companies are also entering the sector as they face competition from new technologies.

## Peer-to-Peer Payments

Whereas proximity payments perform a similar function to a credit card or debit card, peer-to-peer payments can replace cash or a personal check.

For example, one member of a group might pay the bill at a restaurant or one roommate might pay the rent, and others can transfer their shares of the payment to the payer through a peer-to-peer application. Such applications are also useful for transferring funds to college students. The payment app is typically connected to the bank accounts of both parties.

## Security Concerns

More than half of consumers across all age groups express concerns about the security of personal information when using mobile payment technology.<sup>2</sup> With proper precautions, however, paying with your phone could be more secure than paying with plastic.

Most mobile payment apps generate random numbers or tokens, so the merchant does not receive your underlying financial information. (Linking to a credit card offers greater protection from fraud than a debit card or bank account.) Strong passwords and fingerprint access or facial recognition on mobile phones add another layer of protection. However, it's important to be vigilant against phishing or malware attacks, just as you would with your computer.
